UPLOADING FILES TO THE CREATIVE SERVER

In order to connect to creative.colorado.edu from **off campus, you must first download and install a VPN client, and then connect to CU's VPN (Virtual Private Network). Follow the directions at the top of the Creative Server Instructions guide to learn how to do this.

Once you are connected to CU's VPN. Open Fetch or Cyberduck and input your credentials.

In Fetch:

(6				e – c		i o	Ē.		>>
Back Pa	ath Recent	Get	Put	Quick	Look Edit	Get Info WebView	New Folder	Ċ	4
Name				^	Kind	Size	Date	· ·	-
bash logout				Textument	18 bytes	1/12/16			
bash_rofile				Textument	176 bytes	1/12/16			
bashrc			Text_ument		124 bytes	1/12/16			
anome2			Folder		-	1/12/16			
kshrc		Textument		171 bytes	1/12/16				
mozilla		Folder		-	1/12/16				
zshrc		Textument		658 bytes	1/12/16				
public	html				Folder	-	1/20/16		
				C	onnected.				

Click on the **public_html** directory to go inside of it.

Click on the **Put** button and navigate to your local **web** folder. Select the web folder, and choose **Put**.

	1html — creative.c	olorado.edu	
Back Path Rec	ent Get Put Quick Look Edit	Get Info WebView New Folder	»»
	Choose items to put on creative.	.colorado.edu:	
	≣ v eb	C Search

CODE			
Put as: web			
Format: Automatic	•		
If a file already exists:	Replace existing file		
Show hidden files			
		3	
New Folder		Cance	Put

**With Fetch, use Put instead of dragging files because dragging files can result in content being duplicated instead of replaced

In Cyberduck:

You can drag your **web** folder into the **public_html folder**. **Always choose **overwrite** if a dialogue box pops up.

YOUR ASSIGNMENT PORTAL WILL NOW BE VISIBLE HERE:

creative.colorado.edu/~identikey/web/

The public url for all of your work this semester will start with this address

I would like you to have a blank index.html page directly inside of your public_html folder, but if it is confusing to you to have multiple index pages, then skip this for now.

Just remember, for this class, we will ALWAYS be working inside of our 'web' directory.

Whenever you upload new content to the server, always upload your entire <u>web</u> folder so that you maintain the correct structure of your pages!
